

SK23050

ADR Pneumatic Control Panel
c/w Visiwinks

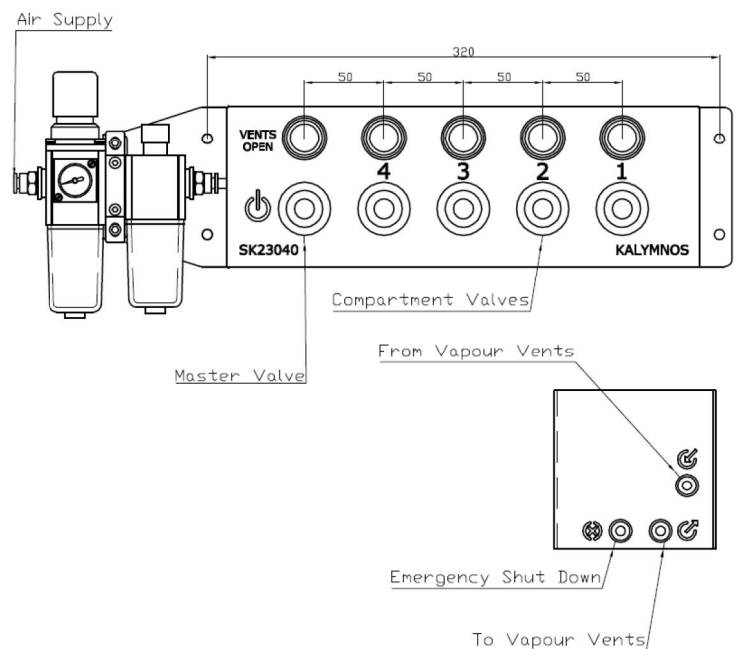

DESIGN CHARACTERISTICS

Based on the experience of KALYMNOS in producing liquid fuel transport equipment, the SK23050 Pneumatic Control Panel, covers the demands of the CEN/TR15120:2013 European Technical Recommendation and offers unrivalled

- **Robust Construction** of the panel made of stainless steel for rust free service life
- **Self-Retracting Master Valve** for opening the systems and the vapour recovery valves, acts also as ESD button
- **Self-Retracting Compartment Valves** for operating individual compartments bottom valves.
- **Conforms** to European Technical Recommendation CEN/TR15120:2013 for optimum tanker equipment interoperability.
- **Air Servicer** unit incorporated for easy installation and connection.
- **Vapour Recovery Vents** automation embedded circuit with ready to plug in ports for easy installation.
- **ESD Port** embedded for easy connection of remote shut off valves.
- **Independent** optic indicators (visiwinks) for each compartment for positive indication that the bottom valve is open.
- **Option** from 1 to 11 compartments available

Overall Dimensions – SK23040

TECHNICAL DATA

Operating Pressure : 400 kPa – 650kPa

Range of Compartments : 1 – 11 Compartments
